name@

! Enter an email address in the format name@example.co

Error summary
There is a problem

Email address: enter a valid address.

[links to Email address]

Phone number (optional)

Save preferences Cancel

FOCUS SPEC: 3 px outline / 2 px offset

Desktop 960 px | narrow 320 px: single-column reflow

Contact preferences / 1

Persistent label
Email address is a visible label; placeholder is not a label.

Required indicator
Email address (required) is the exact required field label.

Example guidance
Example: name@example.com appears before the field.

Invalid entry
The error specimen retains the typed value name@.

Contact preferences / 2

Corrective error
Enter an email address in the format name@example.com.

Non-color error
The invalid field has a text error and an error icon, not red alone.

Keyboard focus
The focused field has a 3 px outline with 2 px offset.

Optional field
Phone number (optional) remains optional and is not an error.

Contact preferences / 3

Primary action
Save preferences is the primary button; Cancel is secondary.

Error focus
On submit, focus moves to the error summary before the invalid field.

Input semantics
Use type=email, autocomplete=email and aria-describedby for hint/error.

Responsive layout
Show desktop 960 px and narrow 320 px states with no horizontal scroll.
