Scheduled maintenance

ORIGINAL EXAMPLE DESIGN / OFFLINE REFERENCE STUDY

i Scheduled maintenance

20 November 2026 | 22:00-23:00 UTC

Application submissions unavailable during this window.

Save a local copy before the maintenance window.

Read maintenance details

Application service

Draft saved.

Scheduled maintenance / 1

Urgency
The banner says Scheduled maintenance; it does not imply an emergency.

Time window
The supplied example window is 22:00–23:00 UTC on 20 November 2026.

Scope
The text says application submissions are unavailable during that window.

User action
Save a local copy before the maintenance window is the actionable instruction.

Scheduled maintenance / 2

Persistent notice
The main notice is not auto-dismissed by a timer.

Non-color cue
A visible information icon and text label identify notice type.

Link purpose
A link reads Read maintenance details, not Click here.

Inline distinction
A separate inline success specimen says Draft saved.

Scheduled maintenance / 3

Live-region policy
Only a newly inserted status is announced politely; static content is not repeatedly announced.

Priority order
The site notice sits above the main service heading.

Narrow state
The 320 px banner reflows its time window and action without clipping.

No false guarantee
The design does not promise automatic submission after maintenance.
