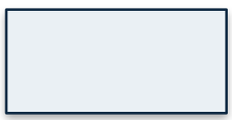
Accessible color tokens

ORIGINAL EXAMPLE DESIGN / OFFLINE REFERENCE STUDY

ink-primary #102A43 on white: 14.64162430:1

action-primary #006D77 on white: 6.08019328:1

ink-secondary #172B4D on white: 14.10203445:1



surface-muted #EAF0F4 on white: 1.14949758:1

surface-default #FFFFFF on white: 1.00000000:1

Version 1.0 | Initial issue | Normal text threshold: 4.5:1

Accessible color tokens / 1

Palette

The palette has exactly #102A43, #006D77, #172B4D, #EAF0F4 and #FFFFFF.

Semantic names

Assign names ink-primary, action-primary, ink-secondary, surface-muted and surface-default respectively.

Contrast matrix

Calculate all five foreground colors against white.

Normal text rule

Only contrast at least 4.5:1 is allowed for normal text.

Accessible color tokens / 2

Large text rule
The 3:1 exception is explicitly limited to qualifying large text, not all text.

No color-only state
Error states require a text or shape cue in addition to color.

Token format
The handoff includes a copyable CSS custom property for every semantic token.

Paired usage
Each token swatch includes its allowed usage and a forbidden-use example.

Light token limit

Surface-muted and surface-default are not recommended as normal foreground text on white.

Computation

Use the WCAG sRGB linearization threshold 0.04045.

Scope boundary

Do not claim palette approval proves whole-product accessibility.

Version handoff

The specification carries version 1.0 and a change-log entry for initial issue.
