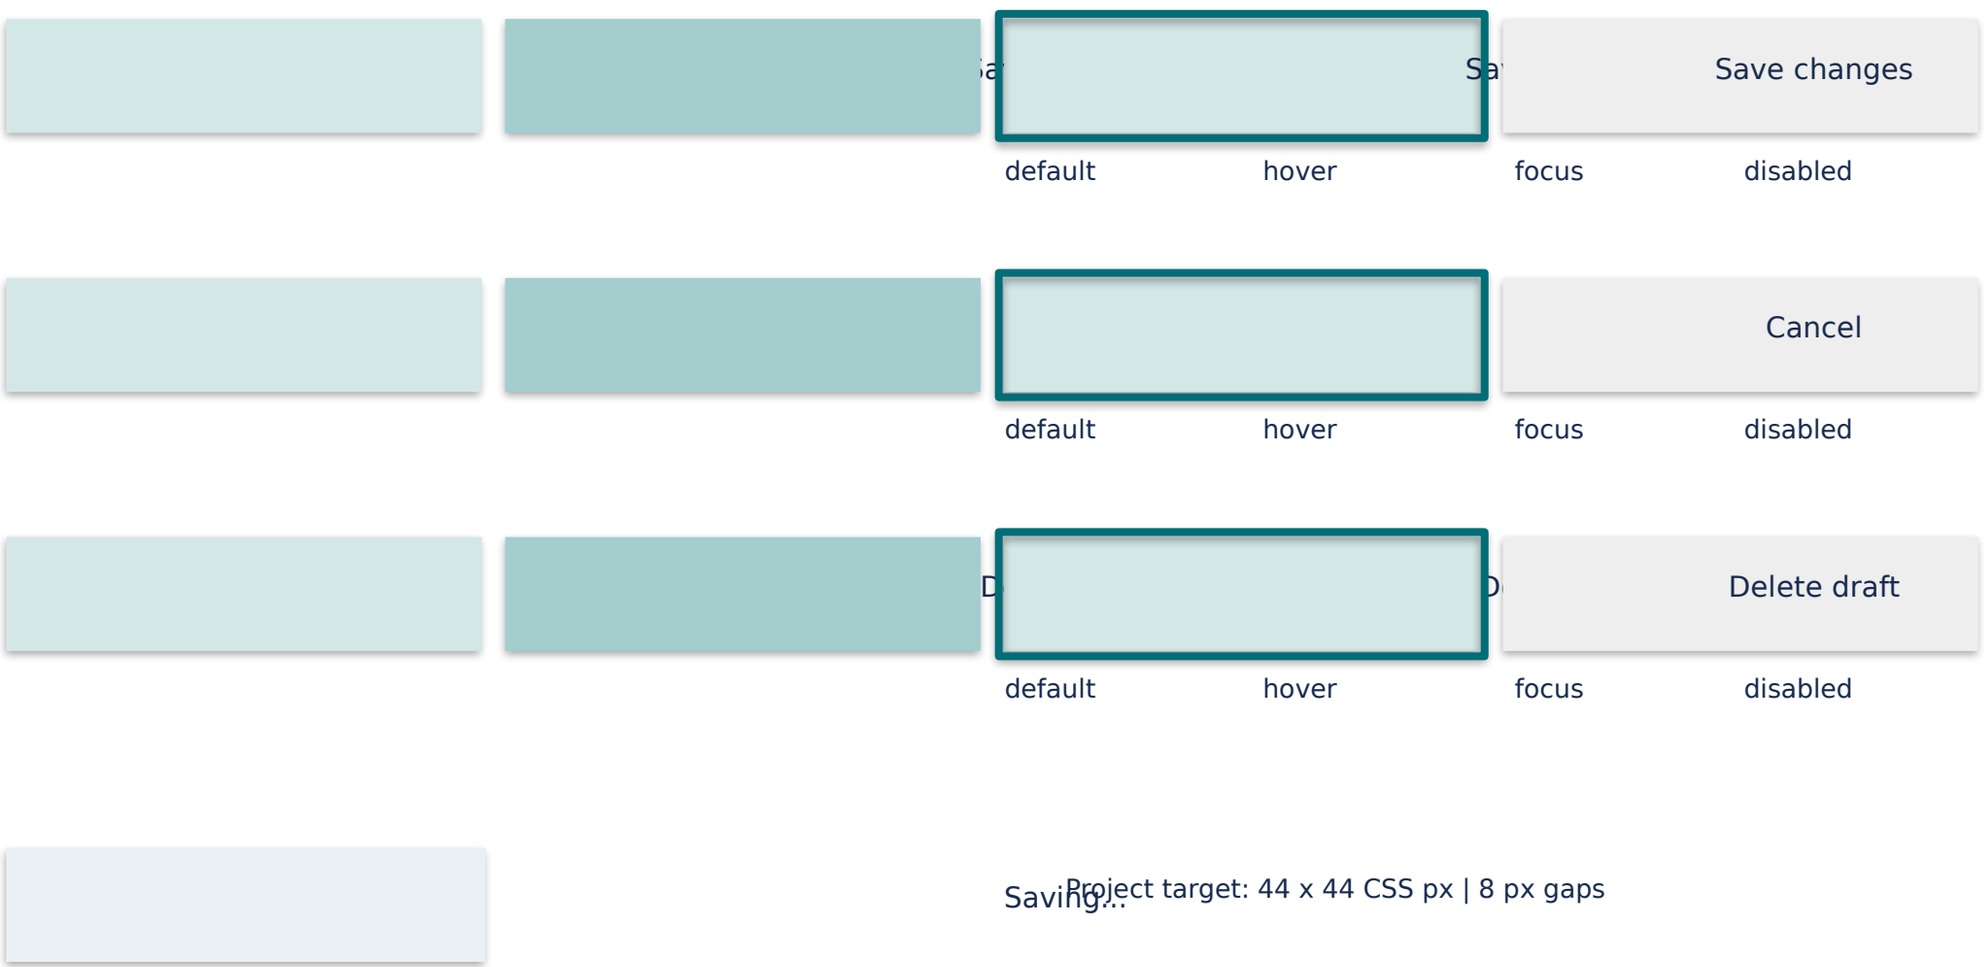
Action button states

ORIGINAL EXAMPLE DESIGN / OFFLINE REFERENCE STUDY



Action button states / 1

Variants
The matrix includes Primary, Secondary and Destructive variants.

States
Each variant shows default, hover, focus and disabled states.

Default label
The Primary sample label is Save changes.

Secondary label
The Secondary sample label is Cancel.

Action button states / 2

Destructive label

The Destructive sample label is Delete draft.

Focus outline

Focus states have a 3 px visible outline with 2 px offset.

Disabled explanation

The handoff notes that disabled controls are not keyboard focusable and are not submitted.

Target size

The chosen design target is at least 44 by 44 CSS px, labelled as a project target rather than WCAG AA minimum.

Action button states / 3

Native semantics
Use button elements; non-submit buttons use type=button.

Loading behavior
The loading specimen says Saving… and prevents duplicate submissions without claiming success.

Spacing
Adjacent action controls have at least 8 CSS px separation in the design.

Usage distinction
The handoff restricts Destructive to irreversible actions and does not use it for Cancel.
