Tillingford Wholesale Grocers — pricing constraints

- Operating scope: published tier pricing will replace rep-quoted pricing across four sales regions.
- The pricing build must retain a documented cost difference for each published tier.
- Counter representatives need a quote response in under one minute during customer calls.
- Legacy SAP contract-price tables remain available until the last regional contract renews.
- Migration is completed region by region, with a controlled handover for each renewing contract.
- Do not allow two active prices for one account in the same week.
- The schedule structure should be defensible to sales and IT reviewers and suitable for D365 build approval.

Source memo for workbook design; no customer or price examples are included.
