ORRINDALE MEDIA | REGIONAL PRODUCTION & STORAGE

Highmarsh Laboratories phased reconfiguration

Contracting guide for Alba Magnusson, Legal

Decision context. Evidence is frozen as at **16 Aug 2026**. This guide supports the **Thursday 20 Aug 2026** contracting decision. It translates the property discussions into a checkable comparison of Buffer Suite, Balanced Exchange, Throughput Suite; it does not select an option or make a facilities-safety determination. [GATE-01]

What Legal is being asked to understand

Highmarsh proposes a phased reconfiguration of Orrindale's warehouse use. The current dedicated-bay arrangement changes first to a time-limited shared-staging arrangement and then to a distinct final suite configuration. The legal task is to connect the selected commercial schedule to objectively described occupancy, handover, rent and credit mechanics. **[Fact]** is drawn from cited records; **[Brokerage read]** is a property/commercial implication; **[Unresolved]** identifies a judgment retained by its named owner.

Oona Quintero's approved interview record is the commercial control record. Magda Desrosiers' later email is retained as context but is not an approved supersession. Mariam Quintero supplies the operating-plan information. Clara Beaulieu retains the facilities-safety determination. [EP-01 to EP-03; OQ-01 to OQ-04; MD-01 to MD-04; MAR-01 to MAR-03; CB-01]

Term control before reading the economics

Controlled term	Meaning used in this guide	Commercial consequence
Exclusive temporary suite (chargeable)	Scenario-specific rentable sf held exclusively during transition. The controlling temporary-area rent is $2.85/rentable sf/month and applies here only. [OQ-01; SC-A to SC-C]	This is the only transition footprint to which the temporary-area rental rate is applied.
Shared staging footprint (operational)	Scenario-specific north cross-dock footprint used non-exclusively with Highmarsh under booked release windows. The operating plan casually calls this the temporary area. [MAR-01; SC-A to SC-C]	It is not chargeable rentable sf under OQ-01. Any stated shared-support charge is shown separately from rent.
Completed Configuration Handover	The approved completed-state handover is 1 Apr 2027; it starts the 12-month completed comparison period. [OQ-04; SCH-01]	The completed configuration is not a continuation of shared staging; the fit-out credit is applied after this handover.

Phases in chronological order

Period	Property / operating state	Commercial reading
Baseline **Current to 30 Sep 2026**	72,000 rentable sf of exclusive storage/process space; four dedicated receiving bays (Bays 5-8) and a dedicated marshalling lane. [BL-01]	Current comparison cost: $130,500/month ($1,566,000 annualized), based on $1.75/rentable sf/month plus $4,500/month support. Not included in proposed horizon totals. [BL-02; BL-03]
Transition **1 Oct 2026 to 31 Mar 2027** **6 full months**	Each option combines an exclusive temporary suite with a larger shared, non-exclusive staging footprint. Routine releases are planned around booked windows and assigned doors. [OQ-03; MAR-01; MAR-02; SC-A to SC-C]	Rent follows the exclusive suite only; shared-support charges remain separate. The exceptional route issue on page 4 is not resolved by routine operating commentary.
Completed state **1 Apr 2027 to 31 Mar 2028** **12 full months**	Each option moves to its own final exclusive-suite / door configuration; the transition shared-staging arrangement ceases at completed handover. [OQ-04; SCH-01; SC-A to SC-C]	Final-suite rent and stated fixed charges apply by option. The one-time fit-out credit follows completed handover, not the transition period. [OQ-02]

Evidence Control and Correction Trail

The earlier internal draft repeated values from the most recent correspondence. The current correction follows the evidence-status rule, not recency: the later email did not meet the formal supersession test and no supersession is logged. The email remains useful to explain why the draft changed. [EP-01 to EP-03]

Commercial field	Later informal email - context only	Controlling position in this guide	Why
Temporary-area rent	$2.65/sf/month, using an undifferentiated term. [MD-01]	$2.85/rentable sf/month for the **exclusive temporary suite only**. [OQ-01]	Approved record controls; email is not a formal supersession. Shared staging is not rate-bearing. [EP-01 to EP-03]
Fit-out credit	$120,000 in a transition invoice. [MD-02]	Up to $96,000, once, for eligible approved-scope receipts; apply against first invoice after Completed Configuration Handover. [OQ-02; PROP-02]	The cap, eligibility and trigger come from the approved record; do not net it into transition rent. [EP-01 to EP-03]
Handover dates	Temporary: 15 Sep 2026; final: 15 Mar 2027. [MD-03; MD-04]	Transition Occupancy Handover: 1 Oct 2026; Completed Configuration Handover: 1 Apr 2027. [OQ-03; OQ-04]	These dates establish 6 transition and 12 completed full monthly periods in the tracker. [SCH-01]

Calculation convention used for the comparison

Component	Treatment	Source trail
Transition recurring	Exclusive temporary suite rentable sf x controlling temporary-suite rate + stated shared-support charge, for six full monthly periods. The shared staging footprint is operational context only.	[OQ-01; OQ-03; SC-A to SC-C]
Completed recurring	Final exclusive-suite rentable sf x option-specific completed rent + stated fixed charge, for 12 full monthly periods.	[OQ-04; SCH-01; SC-A to SC-C]
Fit-out credit	One-time negative item at the approved cap in each displayed case because the tracker shows eligible scope at or above the cap. It follows completed handover.	[OQ-02; PROP-02]
Whole-horizon net	Transition recurring + completed recurring - one-time credit. Dollars are nominal; the tracker shows no escalation or discounting.	[SCH-01]

Brokerage reading. The correction is not a competing price assumption: it restores the approved rent, credit and handover mechanics. Any document that intentionally uses the email values would need an approved supersession under the stated protocol before it could be treated as the current commercial position. [EP-01 to EP-03]

Citation key

Record IDs in brackets locate source evidence in the workbook's Evidence / record register. OQ = Oona Quintero approved interview notes; MD = Magda Desrosiers later email; MAR = Mariam Quintero operating plan; CB = Clara Beaulieu facilities-safety dependency; BL = baseline lease record; SCH / PROP = proposal tracker; SC-A to SC-C = rows in the decision comparison input block.

Like-for-Like Scenario Economics

All figures are nominal dollars. The comparison uses the same 6-month transition and 12-month completed-state windows for every option; one-time fit-out credit is visible separately. Financial source basis: [OQ-01 to OQ-04; SCH-01; PROP-02; SC-A to SC-C].

Metric / period	Buffer Suite	Balanced Exchange	Throughput Suite
Transition: exclusive temporary suite Rentable sf (chargeable)	18,000 rentable sf	14,000 rentable sf	10,000 rentable sf
Transition rent rate $/rentable sf/month	$2.85	$2.85	$2.85
Transition rent / month	$51,300	$39,900	$28,500
Shared staging footprint sf, operational only - no rent applied	42,000 sf	48,000 sf	52,000 sf
Shared-support charge / month	$18,500	$24,500	$30,000
Transition recurring cost (6 months)	**$418,800**	**$386,400**	**$351,000**
Completed: final exclusive suite Rentable sf (chargeable)	54,000 rentable sf	60,000 rentable sf	66,000 rentable sf
Completed rent rate $/rentable sf/month	$1.95	$1.90	$1.85
Completed rent / month	$105,300	$114,000	$122,100
Completed fixed charge / month	$6,000	$8,500	$10,000
Completed recurring cost (12 months)	**$1,335,600**	**$1,470,000**	**$1,585,200**
Fit-out credit, once after 1 Apr 2027	**-$96,000**	**-$96,000**	**-$96,000**
Whole-horizon net transition + completed - credit	**$1,658,400**	**$1,760,400**	**$1,840,200**
Variance vs Buffer Suite same horizon / same credit rule	Base: $0 / 0.0%	+$102,000 / 6.2%	+$181,800 / 11.0%

Brokerage reading. Transition totals differ because the chargeable exclusive suite changes while the separately stated shared-support charge changes; the larger shared-staging footprint is retained for operational comparison but is not rent-bearing. Completed totals then diverge through each final suite's area, rate and fixed charge. This preserves period-specific economics rather than blending the temporary and final states.

Operating and Property Comparison

The transition is a shared-staging period; the completed state is a separate final configuration. The entries below state supplied operating facts first, followed by brokerage contracting implications. [MAR-01; MAR-02; SC-A to SC-C]

Scenario	Transition: property / operating facts	Completed: distinct final configuration	Brokerage contracting read
Buffer Suite [SC-A]	18,000 rentable sf exclusive temporary suite; 42,000 sf shared north cross-dock staging, non-exclusive. Routine releases use booked windows and assigned-door availability. [MAR-01; MAR-02; SC-A]	Final Suite 5: two assigned receiving doors and a 12,000 sf dedicated marshalling apron; transition shared staging ceases at Completed Configuration Handover. [SC-A]	Define exclusive occupancy, non-exclusive staging, access windows and the end of shared staging separately from the final suite. Do not apply the transition rent basis after completed handover.
Balanced Exchange [SC-B]	14,000 rentable sf exclusive temporary suite; 48,000 sf shared north cross-dock staging, non-exclusive. Routine releases use booked windows and assigned-door availability. [MAR-01; MAR-02; SC-B]	Final Suite 5 plus booked Door 7: two assigned doors, bookable third-door access and an 8,000 sf service apron; transition shared staging ceases at Completed Configuration Handover. [SC-B]	Define exclusive occupancy, non-exclusive staging, access windows and the end of shared staging separately from the final suite. Do not apply the transition rent basis after completed handover.
Throughput Suite [SC-C]	10,000 rentable sf exclusive temporary suite; 52,000 sf shared north cross-dock staging, non-exclusive. Routine releases use booked windows and assigned-door availability. [MAR-01; MAR-02; SC-C]	Final Suites 4-5: three assigned receiving doors and no shared-staging zone; transition shared staging ceases at Completed Configuration Handover. [SC-C]	Define exclusive occupancy, non-exclusive staging, access windows and the end of shared staging separately from the final suite. Do not apply the transition rent basis after completed handover.

Distinct transition exception: oversized-equipment emergency dispatch

Sourced exception	Property / contracting significance	Owner and timing
[Fact] The emergency dispatch of oversized production equipment is low frequency but may have a potentially severe consequence. It may require the full east-west transfer route, which overlaps the planned shared-staging footprint during transition. It is not a routine throughput metric. [MAR-03]	**[Brokerage read]** A transition schedule may need to identify the route overlap, access condition and response path separately from normal release-window arrangements. The issue can affect whether and on what condition transition shared staging is made available; this guide does not determine that condition.	**[Unresolved]** Clara Beaulieu owns the facilities-safety determination for the route overlap, shared-staging arrangement and any required condition. None is recorded. Resolve before transition layout release to operations. [CB-01]

Scope boundary. This guide identifies a property and contracting dependency only. It does not state that the route, shared-staging arrangement or any completed configuration is safe, unsafe, compliant or approved.

Why the phase distinction matters

The baseline is a dedicated-bay model. The transition replaces that with shared operational staging alongside a smaller exclusive suite and scheduled access. The completed state ends shared staging and gives each option its own final suite / door arrangement. Those configuration changes explain why the chargeable area, recurring costs, access terms and credit milestone need to remain assigned to their own periods rather than being presented as one continuing warehouse story. [BL-01; MAR-01; OQ-03; OQ-04; SC-A to SC-C]

Contracting Readiness and Ownership

The points below convert the comparison into definitions, measurable milestones and owner-led actions. They are drafting and verification items, not an instruction to accept or reject a scenario.

Item to settle	Concrete contracting point	Owner	Timing / gate
Area definitions	Define exclusive temporary suite (chargeable rentable sf) separately from shared staging footprint (non-exclusive operational sf). Use the selected SC row for quantities; avoid an unqualified use of temporary area.	Oona Quintero / Highmarsh commercial lead	Before commercial schedule is settled for the 20 Aug contracting gate. [EP-02; OQ-01; MAR-01; SC-A to SC-C]
Transition Occupancy Handover and rent commencement	Use an objective handover record identifying the exclusive suite, shared-staging access rules and start of the six full monthly charge periods. The approved handover date is 1 Oct 2026; temporary-suite rent commences by reference to that defined handover.	Oona Quintero / Highmarsh commercial lead; Legal records mechanism	Set in documents before gate; performance date 1 Oct 2026. [OQ-01; OQ-03; SCH-01]
Completed Configuration Handover and fit-out credit	Define the final configuration handover separately from transition. Completed-state rent follows the selected final suite. Apply up to $96,000 once, for eligible approved-scope receipts, against the first invoice after handover.	Oona Quintero / Highmarsh commercial lead; Legal records mechanism	Set in documents before gate; milestone 1 Apr 2027; credit on first post-handover invoice. [OQ-02; OQ-04; PROP-02]
Shared-use operating terms	Record the non-exclusive shared-staging footprint, booked release windows, assigned-door availability, control of staging and the cessation of shared staging at completed handover. Keep shared-support charge separate from rent.	Mariam Quintero for operating plan; Oona Quintero for commercial schedule	Before transition layout release and 1 Oct 2026 handover. [MAR-01; MAR-02; OQ-04; SC-A to SC-C]
Oversized-dispatch exception	Address the east-west route overlap as a separate conditional transition-use dependency, not as a normal throughput assumption. Identify what document treatment follows the facilities-safety determination.	Clara Beaulieu - facilities safety determination; Legal / commercial schedule act on recorded outcome	Before transition layout release to operations. [MAR-03; CB-01]
Evidence version control	State the approved rent, credit and handover terms in the schedule. A departure to the later email values would require the protocol's formal supersession path.	Oona Quintero / Highmarsh commercial lead	Before documents are settled. [EP-01 to EP-03; OQ-01 to OQ-04; MD-01 to MD-04]

Neutral contracting-readiness summary

[Fact] Buffer Suite, Balanced Exchange, Throughput Suite are the three options designated for Thursday comparison. They share the controlled transition rent of $2.85/rentable sf/month, the $96,000 one-time eligible credit mechanics, and the approved 1 Oct 2026 / 1 Apr 2027 handover sequence, while their exclusive areas, shared staging footprints, recurring charges and final configurations differ. [OQ-01 to OQ-04; PROP-01; SC-A to SC-C]

[Brokerage read] The documents can make the selected option commercially legible by locking the two footprint definitions, objective phase and handover triggers, rent commencement, separate one-time credit treatment, and shared-use mechanics. **[Unresolved]** The facilities-safety determination for the transition route overlap remains owned by Clara Beaulieu before the transition layout is released to operations. This briefing frames those dependencies for Legal; it does not choose an option or instruct acceptance or rejection. [CB-01]
