Method and interpretation note

Case identifiers were normalized before records were matched: surrounding whitespace was removed and matching was case-insensitive. The retired helper column was not used as the decision authority because it follows the provisional draft status. The residual formula error in the supplied draft was ignored and not propagated. The unrelated adjacent table was excluded from the case decision. The governing source is the Frozen Contract Snapshot dated 31 August 2028. Adopted interpretation: Accepted customer cancellation. The wording 'after Limeworth contact' reasonably supports a cancellation on the customer's behalf, while 'OH desk actioned' describes the administrative action. The note does not resolve the actor conclusively, so this is a documented reading rather than an assertion of additional facts. Under that snapshot, an accepted customer cancellation is 50% of standard appointment fee; therefore one $245.00 assessment produces a corrected charge of $122.50.
