Gildenhall Alliance

Oregon retail inspection scheduling brief | current as of 15 January 2026

Scope

Applies to Goldfinch Agricultural Oregon retail operations because the employer maintains 500 or more workers. Washington store visits are outside this Oregon snapshot.

April / May posting

For Oregon inspection assignments, the April posting deadline is 1 March 2026 and the May posting deadline is 1 April 2026. Goldfinch plans are timely when finalized on or before the applicable deadline.

Covered work period

Inspection work begins when one-way travel from the supervisor home store begins and ends after equivalent return travel. The supplied four-hour inspection duration sits between those travel periods.

Rest interval

Oregon assignments require at least 10 consecutive hours before the covered work period and at least 10 consecutive hours after it before the next supplied shift. Exactly 10.00 hours passes. If either gap is shorter, premium pay equals the hours short on the smaller gap multiplied by the supervisor regular hourly rate.

Schedule changes

Each recorded late Oregon schedule swap has a modeled planning consequence of $75. The count is an operational scenario assumption and can exceed the ordinary 0-5 planning band. Washington assignments do not incur Oregon posting, rest-premium, or schedule-change consequences.

Use

This brief is the controlling scheduling snapshot for the April and May 2026 inspection plan and is not legal advice.
