Change Authority Source Bundle

Saltmarsh Market Research | supplied evidence for the quarterly service review

Use of this bundle. These extracts are the complete supplied policy and evidence text for the position paper. They are intentionally presented as three layers: client commitment, certified control context, and service-desk operating workflow.

1. Client contract — availability and service-impacting change

Clause	Supplied text
C-AV-1	Supplier shall maintain the agreed service availability commitment and notify Client of a material service-impacting change before
C-AV-2	Where urgent action is necessary to prevent or restore a material availability impact, the Service Continuity Authority may direct i
C-AV-3	The SOC 2 availability commitment is a client-facing trust and performance criterion. It does not itself approve every implementat

2. ISO 27001 Annex A — change-control control description

Reference	Supplied text
A.8 change-control description	Changes to information-processing facilities and systems shall be assessed for impact, authorized, tested whe
Evidence expectation	Evidence may include the change request, impact/risk assessment, authorization, implementation or test resul
Boundary	The control supports traceability and review but does not resolve a conflict between the client continuity clause

3. Service-desk change scheme (ITIL-shaped operating evidence)

Category / state	Supplied operating rule
Normal change	Log the change; assess impact and implementation plan; obtain Change Authority approval before impleme
Routine / pre-authorized change	A repeatable, low-risk change may use a documented procedure that is already in the approved routine cat
Emergency change	The Emergency Change Authority must confirm before implementation. If the named on-call approver is the
Status boundary	“Assess”, “Scheduled”, “Approved”, “Implemented”, and “Closed” describe workflow handling. A normal wor

4. Constraints and disagreement carried in the evidence

Situation	Supplied text
Emergency disagreement	The client clause permits the Service Continuity Authority to direct urgent implementation to protect availability. T
One on-call approver	On some evenings only one on-call approver is available. The scheme provides no second approver and does no
Planned maintenance window	The textbook full review may not finish before a planned window. Time pressure does not waive approval or cont
