Controlled Leasing Evidence Proposal

Prepared by Everstead Council | **For** Gallowspring Institute | **Packet as of** 14 Aug 2026

Purpose and basis

This external-facing assessment evaluates the leasing evidence in the supplied Everstead Council leasing-pipeline packet for Gallowspring Institute's six-unit commercial property. It is limited to that dated packet as of 14 Aug 2026; it does not add market, rent, occupancy, or other outside information.

3	2	1
Dated commercial-interest signal of 5 distinct cleaned inquiries	Screening recorded as complete of 5 distinct cleaned inquiries	Both attributes supported of 5 distinct cleaned inquiries

Definition and control application

Interpretation selected for this proposal. A *qualified tenant* means a distinct, cleaned, in-scope inquiry with an explicit, dated commercial-interest signal. On that definition, the packet supports **3 qualified tenants out of 5 distinct cleaned inquiries**. This choice follows the supplied mandatory condition for a current commercial-interest claim and is the limited client-facing claim the packet supports.

Mandatory condition. The supplied controls require the dated interest signal for a current commercial-interest claim. The original pipeline label is therefore not used as proof by itself.

Advisory corroboration. A second contact is present for GS-6U-041 and GS-6U-043. It is not recorded for GS-6U-045; that limits corroboration but does not negate its explicit dated interest signal because the supplied control treats a second record as should-level support, not a mandatory condition.

Alternate reading retained, not used as the headline. If the phrase instead meant completed financial screening, the count would be 2 of 5 (GS-6U-042 and GS-6U-043). One of those has no dated current-interest signal, so this alternate reading would answer a different question.

Cleaned population

Reconciliation of the supplied extract	Rows / inquiries	Treatment
Raw pipeline rows	8	Starting extract population
Outside the property scope	-1	LP-24108 concerns another commercial listing
Duplicate row with no new evidence	-1	LP-24102 is the same inquiry as LP-24101
Malformed record	-1	LP-24107 has no inquiry reference and an invalid interest date
Cleaned assessment population	**5**	**Distinct in-scope inquiries; not people or raw pipeline rows**

Evidence register

Inquiry / source	Verified commercial-interest evidence	Verified screening status	Control treatment
GS-6U-041 LP-24101, LP-24102	Yes - email, still reviewing the six-unit space; asked for viewing times (12 Aug 2026)	Not started	Counts once; corroborating call recorded 13 Aug
GS-6U-042 LP-24103	No dated active-interest signal recorded	Complete (8 Aug 2026)	Screening does not establish current interest
GS-6U-043 LP-24104	Yes - email, confirms active interest in the six-unit property (10 Aug 2026)	Complete (11 Aug 2026)	Interest and screening are separately supported; corroborating call recorded 12 Aug
GS-6U-044 LP-24105	No affirmative conclusion - undated pipeline note only	Pending	Unresolved; no positive evidence under selected definition
GS-6U-045 LP-24106	Yes - email, interested in terms for this six-unit property (11 Aug 2026)	Pending	Counts for selected definition; no second contact recorded

Boundaries and record exceptions

Verified source facts. LP-24101 and LP-24102 share GS-6U-041 and carry no different usable evidence, so they are one inquiry. LP-24107 is excluded because its inquiry reference is absent and its interest-signal date is invalid. LP-24108 is excluded because it is for another commercial listing.

Interpretation. Original labels such as "Qualified Tenant" and "Active interest" are reconciled to the dated interest and screening fields rather than accepted at face value. Commercial interest and completed financial screening remain separate attributes.

Assumption and unresolved gap. No assumption fills missing dates or statuses. GS-6U-044 has an undated interest note and a pending screening status, so it is not affirmative evidence. These source limitations bound the assessment; they are not a finding that no leasing opportunity exists.

Information handling. Restricted applicant financial particulars in the source packet and draft note are omitted. Only the screening-status labels needed to distinguish the two attributes are included.

Recommendation (evidentiary use only)	Use *qualified tenant* in this proposal only for the **3 distinct cleaned, in-scope inquiries** with explicit dated commercial-interest evidence. Completed financial screening remains a separate reported attribute and does not substitute for the mandatory interest condition. This is a bounded evidence definition from the supplied packet, not a recommendation that Gallowspring Institute take a leasing action.
