Decision memorandum

Vantridge Manufacturing retail-counter case file

CASE	CLIENT	INVESTIGATOR
UM-VM-2705-17	Vantridge Manufacturing	Alia Nightingale
DECISION-MAKER	**JURISDICTION / AS-OF**	**DECISION DEADLINE**
Lachlan Wolstenholme	England and Wales / 12 May 2027	14 May 2027, 16:00 BST

DECISION REQUIRED	RECOMMENDATION
Lachlan Wolstenholme must decide by **14 May 2027, 16:00 BST** whether to authorize a targeted interview of Odile Chidozie and an amended access-control arrangement under the supplied England and Wales requirements snapshot.	**Authorize the targeted interview. Approve in principle a temporary, least-privilege removal of export/download rights for Odile Chidozie in the Retail Counter Pricing workspace, retaining view-only access. Neither action is completed by this memorandum.**

1. Case question and scope

This memorandum answers the question in the authority note: are the recorded retail-counter and directly linked access records sufficient to justify a focused interview and a narrow access amendment, without treating a correlation or a near-equal rate as proof of misconduct? The answer is yes for those proportionate information-gathering and protective steps, subject to Lachlan's recorded approval. The evidence establishes recorded activity and an unresolved question about the purpose and handling of quote-register downloads; it does not establish intent or misconduct.

Scope is limited to retail-counter pricing or quote activity from 4 to 11 May 2027 linked by the exact field label **Source Visit Key**. The source record with key **SVK-270511-WH-04** (access record AX-7769 [X]) is a Warehouse Receiving badge event associated with Idris Lockhart and is outside the case question. It is retained for auditability but excluded from findings, interview scope, and controls. Lachlan Almeida is identified in the authority note as Vantridge Manufacturing's retail-counter supervisor and may be a factual contact; he is not the proposed interview subject.

2. Source facts and reconciliation

Source facts. The counter export records the visit observations, employee association, source record IDs, dates, and unit rates. The access extract records the activity time, workspace, action, result, employee association, and access record IDs. Factual findings below are traceable to the row-level IDs shown in the tables. [C] = counter_visit_evidence.xlsx; [X] = access_activity_extract.xlsx; [A] = case_authority_and_scope.docx; [R] = england_wales_requirements_snapshot.pdf.

Reconciliation judgement. I grouped rows only on the authority-defined Source Visit Key. A matching key is one underlying visit even when the row is present in both exports; a different key remains a separate visit. The counter export's **Retired Visit Group** helper field was not read as evidence, used as a grouping key, or copied into this decision basis. Its values conflict with the independent source keys (for example, separate keys are assigned the same legacy group), so relying on it would make the index non-reproducible.

For rates, I used an absolute-difference tolerance of **GBP 0.000001** for reconciliation only. Values within that tolerance are displayed to two decimal places; this avoids machine floating-point noise without claiming more precision than the source supports. The two representations for **SVK-270508-ALB-03** are 18.7500000000 and 18.7500000002 GBP, so they are one operational rate for this index. The 18.75 and 19.20 values on distinct keys remain distinct; the tolerance does not erase that difference.

Canonical retained evidence basis (one row per distinct source key)

SVK-270504-ALB-01	04 May 2027	Odile Chidozie	Albemarle retail counter: Quote prepared for Vantridge order; customer requested 12 units	CV-1048 (row 5)	AX-7712 (row 5)	18.75
SVK-270506-ALB-02	06 May 2027	Odile Chidozie	Albemarle retail counter: Quote amended after quantity query; rate card consulted	CV-1052 (row 6)	AX-7721 (row 6)	18.75
SVK-270508-ALB-03	08 May 2027	Odile Chidozie	Albemarle retail counter: Counter order note recorded; supervisor review requested	CV-1061 (row 7) CV-1061-R (row 8)	AX-7734 (row 7)	18.75
SVK-270509-ALB-04	09 May 2027	Odile Chidozie	Albemarle retail counter: Follow-up quote printed for customer collection	CV-1068 (row 9)	AX-7740 (row 8)	18.75
SVK-270510-ALB-05	10 May 2027	Odile Chidozie	Albemarle retail counter: Return query logged and price correction checked	CV-1074 (row 10)	AX-7756 (row 9)	19.20
SVK-270511-ALB-06	11 May 2027	Odile Chidozie	Albemarle retail counter: Replacement quote issued; supervisor sign-off noted	CV-1080 (row 11)	AX-7762 (row 11)	19.20

The index contains 6 in-scope canonical keys from 7 counter rows and 7 access rows. The repeated counter rows CV-1061 and CV-1061-R are lineage for the single key SVK-270508-ALB-03, not a second incident.

3. Chronology and what it supports

The chronology below is a source-led sequence of access events linked to the same 6 in-scope keys. Each event shows a granted action in the Retail Counter Pricing workspace and is associated in the export with Odile Chidozie. That association supports a focused clarification interview. It does not, without Odile's explanation or further evidence, establish why a download or export occurred, who requested it, whether material was retained, or whether it was shared.

When	Source Visit Key	Area / action	Employee	Source ID
04 May 2027 09:14:22	**SVK-270504-ALB-01**	Retail Counter Pricing workspace Viewed rate card	Odile Chidozie	AX-7712
06 May 2027 15:42:07	**SVK-270506-ALB-02**	Retail Counter Pricing workspace Downloaded quote register	Odile Chidozie	AX-7721
08 May 2027 10:03:41	**SVK-270508-ALB-03**	Retail Counter Pricing workspace Viewed rate card	Odile Chidozie	AX-7734
09 May 2027 13:27:12	**SVK-270509-ALB-04**	Retail Counter Pricing workspace Exported quote register	Odile Chidozie	AX-7740
10 May 2027 16:11:55	**SVK-270510-ALB-05**	Retail Counter Pricing workspace Viewed rate card	Odile Chidozie	AX-7756
11 May 2027 11:06:18	**SVK-270511-ALB-06**	Retail Counter Pricing workspace Downloaded replacement quote	Odile Chidozie	AX-7762

Requirements considered

Requirement in supplied snapshot [R]	Application here
Purpose limitation and scope	Keep the Warehouse Receiving record outside the decision; do not turn it into a new allegation or restriction.
Targeted, fair interview	Ask only about the linked visits and the recorded download/export actions, give Odile an opportunity to explain, and record the outcome.
Least privilege and approval	Limit the proposed change to export/download permission in the named workspace; Lachlan approves and Idris implements only after approval.
Review, expiry, and audit trail	Use the earlier of 21 May 2027 or completion of the interview/evidence review as the review point; log approver, implementer, scope, reason, time, and end/revision decision.
Evidence integrity	Preserve both source exports, cite source IDs, and retain the key-based reconciliation and rate tolerance in the case file.

4. Action recommendation

Targeted interview	Authorize a focused interview of **Odile Chidozie** about the retail-counter visits and the granted download/export actions for SVK-270506-ALB-02, SVK-270509-ALB-04, SVK-270511-ALB-06. The interview is for clarification, not a finding of misconduct.	**Owner:** Alia Nightingale to arrange and conduct. **When:** complete by 14 May 2027, 16:00 BST. **End point:** record questions, Odile's explanation, attendees, date, and outcome in the case file; close or revise the recommendation after that record is reviewed.
Access amendment	Authorize in principle a temporary least-privilege change for Odile Chidozie: retain view-only access to the **Retail Counter Pricing workspace**, remove export/download permission, and leave other access untouched. This addresses the specific recorded actions while avoiding a blanket suspension.	**Owner:** Idris Lockhart, access administrator, after Lachlan's recorded approval. **Review:** 21 May 2027 or completion of the targeted interview and evidence review, whichever is earlier. **End/revise:** Lachlan records whether export/download remains needed; restore or narrow the change accordingly.

Immediate next action for Lachlan: by 14 May 2027, 16:00 BST, record approve or decline for each decision item in the case file and name the owner. If approved, Alia Nightingale sends Odile Chidozie a focused interview invitation and Idris Lockhart receives the specific view-only/export-download instruction. No instruction should be treated as executed until the responsible owner records the action and its audit details.

Why this is proportionate. The proposed interview addresses an identifiable information gap in the access chronology. The proposed access amendment protects the named pricing workspace while preserving the view access needed for the counter role. The recommendation does not rely on the excluded Idris Lockhart record, the retired helper values, or rate similarity as evidence of wrongdoing.

5. Authorized case-file changes recorded

I recorded the following changes within the case file under the authority note. These entries document the evidence and decision status; they do not alter the source workbooks or an external access-management system.

Recorded case-file change	Support	Status / boundary
Added a canonical evidence index keyed by Source Visit Key, with one retained representation per key, counter and access source IDs, and the scope disposition for SVK-270511-WH-04.	case_authority_and_scope.docx, Authority and permitted case-file changes; counter_visit_evidence.xlsx; access_activity_extract.xlsx	**Completed in this case-file memorandum.** Source workbooks were not edited.
Recorded the reconciliation note: same-key rows are linked; the Retired Visit Group field is excluded; the two near-equal rate representations for SVK-270508-ALB-03 are operationally normalized to GBP 18.75 for this decision.	case_authority_and_scope.docx, Source-visit key; counter_visit_evidence.xlsx source records CV-1061 and CV-1061-R	**Completed as an analyst judgement.** The tolerance is for reconciliation only and does not assert commercial identity.
Updated the case-file status to decision pending and attached this memorandum for Lachlan Wolstenholme's decision.	case_authority_and_scope.docx, Authority and permitted case-file changes	**Completed in the case file.** The interview and access amendment remain proposed actions, not completed system actions.

Source register

case_authority_and_scope.docx [A]	Case roles, question, scope boundary, exact Source Visit Key definition, authority, and deadline.
counter_visit_evidence.xlsx [C]	Visit dates, observations, employee association, source IDs, and unit-rate representations; row numbers are retained in the evidence index.
access_activity_extract.xlsx [X]	Access chronology, workspace, action, result, employee association, and access source IDs.
england_wales_requirements_snapshot.pdf [R]	Frozen England and Wales requirements as of 12 May 2027: purpose limitation, evidence handling, targeted interviews, authorization, least privilege, review/expiry, and audit trail.

Prepared by Alia Nightingale, Investigator, Underhill Mutual. Status: decision pending. This memorandum records the analyst's reconciliation and recommendation for Lachlan Wolstenholme; it is not a finding of misconduct and is not evidence that an external access change has been executed.
