DRAFT FOR PETRA GARRIDO APPROVAL

Revised patient-transfer operating plan

One medically complex patient | Fallowbrook Terminals | Ontario -> Quebec

Purpose. A controlled, evidence-traceable plan for one external transfer through the terminal, from readiness and release through receiving acceptance and closeout. The package is designed for Petra Garrido and the transfer team to use without author-side clarification.

CURRENT DISPOSITION

CONDITIONAL APPROVAL
for controlled execution

Release boundary. Petra must record approval and all release gates must be green. Until then: **HOLD**. No approval or quote is represented as confirmed.

Routine workflow stops at an acute trigger, missing control, or unresolved Ontario-Quebec conflict. Page 6 governs.

AT A GLANCE

HANDOFF DEADLINE

Friday 21 Aug 2026, 15:00 local terminal time (calendar and slot are assumptions to verify)

PLAN OWNER

Iris Carmody, Bellwether Trust

REVIEW BASIS

Anders Dimitrov review finding: escort coverage changed; Ontario and Quebec controls do not align in one place

COORDINATION

Granthill Chambers + Saltcombe Partners; working role allocation, availability to confirm

PRIVACY BOUNDARY

This package contains no patient name, record number, date of birth, address, diagnosis, or direct identifier. At release and handoff, the sending service performs the controlled identity match and shares only the minimum information needed for safe transfer.

Gates, owners, and communication

The routine path is a sequence of release decisions, not a promise that the transfer will always proceed.

ROUTINE CONTROL RAIL

G0 Ready
Clinical lead + Iris
Pack complete; status suitable

→

G1 Release
Petra Garrido
Approve / hold / reschedule

→

G2 Terminal
Escort lead
Secure movement begins

→

G3 Transition
Granthill + escort
Dual control; no gap

→

G4 Accept
Receiving role
Acceptance before release

→

G5 Close
Iris Carmody
Record, reconcile, close

DECISION AUTHORITY

Decision	Authority map
Routine release	Petra approves. Iris confirms green gates; clinical lead confirms suitability.
Stop / redirect	Any escort may stop. Clinical lead or emergency service directs the safety path; Iris coordinates.
Alternate spend	Petra approves routine alternate coverage, holding, or reschedule. Emergency response is never delayed.
Receiving release	Receiving role acknowledges acceptance; escort remains to recorded receipt.

COMMUNICATION PATH

Trigger	Role path	Minimum message
At G0/G1	Iris -> Petra / clinical lead / Granthill	Gate status, gaps, approval or hold
Movement	Escort lead -> Iris -> Saltcombe	Departure, terminal entry, transition, variance
At G4	Receiving role -> escort + Iris	Acceptance, status, risks, meds/equipment, acknowledgment
Exception	Escort / clinical lead -> local emergency service + Iris	Stop, location, trigger, disposition; Petra and receiving notified

BOUNDARY: ONE STANDARD WORKFLOW CEASES HERE

Open a separate branch at the first acute deterioration trigger, missing mandatory release/acceptance/escort/document control, or unresolved Ontario-Quebec conflict. The team pauses at the safest available location, names the decision authority, communicates the gap, and records the disposition. It does not place the exception in a footnote or continue by convention.

Operational schedule through handoff and closeout

All times are local terminal time. Friday 21 Aug 2026 and the 15:00 acceptance deadline are calendar/slot assumptions until verified.

WHEN	MILESTONE / GATE	ACCOUNTABLE OWNER	REQUIRED EVIDENCE / DEPENDENCY	COVERAGE / DISPOSITION
Mon 17 Aug 09:00-12:00	**S1 | G0 planning lock** Reconcile draft and contacts	Iris Carmody	Anders finding; one-patient scope; v1.1 status; working roles opened with Granthill and Saltcombe.	No movement; draft for Petra.
Tue 18 Aug by 16:00	**S2-S3 | G0 readiness + privacy** Build the release pack and secure record	Sending clinical lead + Iris / Granthill	Status + transport suitability within 4h; current orders; handoff summary; consent/capacity; controlled identity match; Ontario/Quebec request.	**HOLD** if any item is incomplete.
Wed 19 Aug by 12:00	**S4 | G0 receiving acceptance** Confirm destination	Saltcombe receiving coordinator	Slot/readiness and accepting role confirmed; acceptance current for the window.	**NO RELEASE** without acceptance.
Thu 20 Aug 10:00-14:00	**S5 | Escort + equipment check** Brief, fit, rehearse	Escort lead / Saltcombe	A/B availability, route brief, fitness/competency, medication/equipment/monitoring/backup check.	**NO-GO** if a leg is uncovered.
Thu 20 Aug by 12:00	**S6 | G3 jurisdiction verification** Resolve control difference	Granthill Chambers	Ontario release, transition, Quebec acceptance controls; as-of check; partner/terminal controls.	Conflict -> controlled hold.
Thu 20 Aug 16:00	**S7 | G1 approval freeze** Petra decision gate	Petra Garrido	G0/G3 green; acceptance; escorts; estimate and variance authority reviewed.	Approve, hold, or reschedule.
Fri 21 Aug 06:30-08:00	**S8-S9 | Final readiness + dispatch** Reconfirm, then release to movement	Iris + clinical lead -> Saltcombe transport	By 07:00: status, orders, summary, consent, equipment, escorts, acceptance, and secure channel green. Then Petra approval, G1 release, transport + Escort A present.	If not green, hold at origin; dispatch only after G1.
Fri 21 Aug 08:00-09:00	**S10 | Fallowbrook entry / staging** Secure terminal movement	Escort A + terminal liaison	Controlled identity match; secure records; equipment accountability; approved staging point.	Delay -> safe hold; notify Iris.
Fri 21 Aug 09:00-11:30	**S11 | Ontario movement** Continuous first-leg coverage	Escort A / clinical support	Continuous escort; monitoring and essential supplies; departure/exit check-in.	Acute trigger -> page 6.
Fri 21 Aug 11:30-12:00	**S12 | Ontario-Quebec transition** Dual-control overlap	Escort lead + B + Granthill	Dual acknowledgment; transition packet; secure records; no unverified handoff.	A remains until B accepts.
Fri 21 Aug 12:00-13:30	**S13 | Quebec movement / staging** Destination-side route	Escort B / Saltcombe	Acceptance remains current; secure communications; ETA monitored against 15:00.	Projected miss -> variance gate.
Fri 21 Aug 13:30-14:00	**S14 | Clinical handoff** Receiving acceptance	Receiving service + Escort B	Privacy-conscious match; status; risks; medication/equipment/monitoring; acknowledgment.	Escort stays until receipt.
Fri 21 Aug 14:00-15:00	**S15 | Buffer / deadline decision** Protect Friday handoff	Iris -> Petra	60-minute buffer; receiving acknowledgment no later than 15:00 local.	Miss projected -> pause, redirect, or reschedule.
Fri 21 Aug by 16:00	**S16 | G5 closeout** Complete the record	Iris Carmody	Signed handoff; exception log; equipment/records reconciliation; actual spend/contingency disposition.	Close after acceptance and record.

Release controls, escort continuity, and handoff receipt

Minimum necessary clinical information is carried through a controlled record; the plan is not a treatment protocol.

G0 | MINIMUM RELEASE PACK

Sending clinical lead confirms readiness; Iris records the gate. Each item is required before release.

- **Current status + transport suitability** confirmed within 4h of release; numeric thresholds remain in current clinical orders, not this plan.
- **Current clinical orders** and transfer documentation available to the escort/receiving role.
- **Concise handoff summary** with outstanding risks and what the receiving role must watch for.
- **Medication continuity:** current list, last/next due information from the sending service, and secured supply.
- **Essential equipment / supplies:** power or backup, monitoring, and accountability check complete.
- **Consent, capacity, or substitute decision authority** confirmed before movement and disclosure.
- **Receiving acceptance** is current and names the accepting role; secure channel is tested.

Safe boundary: missing item = hold at origin or approved safe holding point. No improvised completion.

ESCORT REVISION | REVIEWED DRAFT -> V1.1

Review finding: the prior single-assignment coverage cannot be relied on for the revised availability. v1.1 uses two role-briefed escorts with an overlap at the Ontario-Quebec transition.

LEG	CONTINUOUS COVERAGE	CONTROL / NO-GO
Origin -> Fallowbrook	**Escort A** + transport crew	A present before release.
Terminal staging -> Ontario	**Escort A** + terminal liaison	A stays through secure staging.
Ontario movement	**Escort A** + clinical support	Continuous; acute trigger -> page 6.
Transition overlap	**A + Escort B** together	Dual acceptance of records, route, and coverage; no gap.
Quebec movement -> arrival	**Escort B** + clinical support	B remains through staging.
Arrival -> receipt	**Escort B** remains	No drop until receipt.

Coverage condition: A/B are route-briefed, fit, privacy-aware, and competency-verified for this complexity and route. Saltcombe holds named backup; if unavailable at S8, Iris holds and Petra may approve an alternate.

WHO CAN ACT

Petra
Routine release, funding, and alternate-spend approval.

Iris
Operational gate, pause, communications, and closeout.

Clinical lead
Suitability; may stop or direct safe clinical path.

Escort
May call stop immediately; does not diagnose or improvise.

Receiving role
Accepts destination handoff; confirms readiness.

Granthill
Verifies Ontario-Quebec control points; flags conflict.

G4 HANDOFF RECEIPT + ROUTINE SAFETY CONTROLS

Identity: sending service performs the privacy-conscious match; only the controlled transfer record is used in the working packet.

Status: current status and transport suitability; outstanding risks and escalation triggers.

Continuity: medication status and essential equipment/supplies/monitoring accounted for.

Documents: current orders, transfer documentation, concise summary; secure receipt confirmed.

Acknowledgment: named receiving role records acceptance, date/time, and any variance.

Ontario-Quebec comparison and transition ownership

Operational guidance and verification requirements only. No statutory threshold, permit, or legal conclusion is asserted.

As of 16 Aug 2026. No jurisdictional policy bundle was supplied. Granthill Chambers verifies current policy, partner, and terminal requirements by Thu 20 Aug 12:00 local; unresolved control conflict is a no-go for G3.

CONTROL POINT	ONTARIO | ORIGIN / INITIAL LEG	QUEBEC | DESTINATION / FINAL LEG	PLAN MAPPING
Release + disclosure	**Before G1:** verify sending authorization, consent/capacity or substitute authority, minimum disclosure, and transport suitability.	**Before G4:** verify authorized receiving role, planned-window readiness, and ability to receive the minimum record.	**Split gate:** clinical lead + Iris own Ontario release; receiving role + Saltcombe own Quebec acceptance.
Coverage + records	**Confirm:** Fallowbrook access, Escort A route brief, secure staging, current orders, concise summary, and equipment accountability.	**Confirm:** Escort B continuity, arrival access, local communication, handoff coverage, and secure record receipt.	**G3 overlap:** A/B dual acceptance; Granthill verifies the transition packet; missing receipt = hold.
Emergency interface	**Verify:** local emergency-service access and safe return/diversion options at origin-side locations.	**Verify:** destination emergency interface and receiving escalation path for the final leg.	**Location governs:** clinical lead/emergency service directs; routine approval never delays emergency response.
Timing + verification	Origin controls concentrate before release/departure; exact partner and terminal timing is unconfirmed.	Destination controls concentrate before acceptance/closeout; acceptance must remain current at handoff.	**G1, G3, G4:** separate evidence and owners; one jurisdiction is not assumed to control the whole route.

TRANSITION OWNERSHIP

Boundary statement: the one-standard-workflow convention stops at G3 because Ontario release controls and Quebec acceptance controls are placed at different operational points. The overlap and separate evidence packet make that difference visible and owned.

When the routine workflow stops: acute deterioration and incomplete procedure

Two distinct branches govern failure conditions. This page supersedes the routine schedule when triggered.

A | ACUTE DETERIORATION BRANCH

Operational trigger - a new or worsening airway, breathing, or circulation concern; altered responsiveness; uncontrolled bleeding or seizure; a monitoring alarm outside the current clinical orders; or the clinical lead/escort judges movement unsafe.

1 STOP Any escort may call stop. Move only to the safest available position; do not continue terminal or route routine.

2 PROTECT Maintain trained observation and essential support within current orders and competency. This page is not a treatment protocol.

3 ESCALATE Call local emergency services (911 where available), state location/access, and provide a concise status. Iris notifies Petra, Saltcombe, and the receiving role.

4 DECIDE The clinical lead and local emergency service determine stabilization, diversion, safe return, or abort. Petra does not override clinical safety.

5 RESUME **Only if** clinical suitability is documented; receiving service reaccepts; coverage and route controls are restored; Iris and Petra reauthorize the revised plan. Otherwise reschedule/abort.

Required event record: trigger, time, location, immediate action, decision authority, emergency/receiving contacts, disposition, and resume/abort status.

B | INCOMPLETE PROCEDURE / CONTROL GAP

Trigger - any required control is missing before the next gate: current orders/status, consent or substitute decision authority, receiving acceptance, Escort A/B or backup, jurisdiction verification, essential equipment/medication continuity, secure channel, terminal access, or a Friday-feasible ETA.

ACTION	OWNER / SAFE OUTCOME
Hold	**Iris** places a safe hold at origin or an approved terminal holding point. No release, continuation, or improvised completion.
Escalate	**Owner of the gap** logs it and notifies Iris; clinical lead may stop/return; Granthill resolves jurisdiction; Saltcombe restores transport/escort; receiving role confirms acceptance.
Fallback	Close the gap before the next gate; or use an approved safe return; or controlled reschedule. An alternate arrangement requires Petra approval and current receiving acceptance.
Resume	All original evidence is present, coverage is continuous, receiving acceptance is current, revised ETA remains Friday-feasible, and Iris/Petra reapprove.
Record	Exception log fields: gap, time, responsible owner, decision authority, decision, communications, disposition, and reauthorization time.

Hard rule: no required control + no named authority = no movement. A delayed step is not silently treated as complete.

CAD planning allowance and unresolved items

All amounts are internal planning estimates because no quote, invoice, or committed funding was supplied.

PLANNING BUDGET | CAD

COST LINE / PLAN LINK	BASIS AND STATUS	CAD
Transport / terminal (S9-S15)	Route allowance; quote not supplied. **Estimate.**	$4,800
Escort A/B + overlap (S5, S9-S14)	Coverage, overlap, backup standby; quote not supplied. **Estimate.**	$2,400
Clinical / safety (S2, S5, S11-S14)	Readiness + movement support; rate not supplied. **Estimate.**	$1,250
Supplies / equipment (S2, S5, S11-S14)	Essential reserve; inventory not supplied. **Estimate.**	$900
Secure records / coordination (S1-S16)	Terminal coordination + closeout. **Estimate.**	$650
Subtotal	Sum of planned line items	**$10,000**
Contingency | 15% of subtotal	Variance control; not committed funding	**$1,500**
TOTAL PLANNING ALLOWANCE	Subtotal + contingency; taxes/emergency treatment excluded	**$11,500**

FUNDING AND VARIANCE CONTROL

- **Status:** $0 confirmed in this package; no quote, invoice, or approval is represented as fact.
- **Authority:** Petra Garrido is accountable for routine spend and alternate coverage; Bellwether finance records commitment and actuals.
- **Use contingency when:** replacement escort, approved holding, route/terminal delay, or essential supply variance is triggered and logged by Iris.
- **Above total:** obtain Petra approval before routine commitment. Emergency response is not delayed for routine funding; notify and document afterward.
- **Unused:** return to uncommitted balance and record actual spend at G5.

ASSUMPTIONS AND UNRESOLVED ITEMS

Each item has an owner, a decision/verification point, and a controlled consequence. A bare assumption is not a release condition.

ID	ASSUMPTION / OPEN ITEM	IMPACT IF UNRESOLVED	OWNER	DUE POINT	CONSEQUENCE / DISPOSITION
A1	**ASSUMPTION:** Fri 21 Aug 2026, 15:00 local slot.	Feasibility and buffer not proven.	Saltcombe + Petra	S4 / before S7	Changed/no slot -> hold and rebaseline.
A2	**VERIFY:** Terminal access, route/time, safe holding point.	Terminal delay or location ambiguity.	Saltcombe liaison	S6 / before S9	No access/hold -> no dispatch.
A3	**VERIFY:** Escort A/B + named backup availability, fitness, route competency.	Continuous coverage not assured.	Iris + escort lead	S5 / S8	No coverage -> safe hold; Petra approves alternate.
A4	**VERIFY:** Ontario-Quebec policy, partner, terminal controls.	G3 conflict or invalid evidence.	Granthill Chambers	S6 / Thu 20 Aug 12:00	Unresolved -> no crossing; reschedule.
A5	**VERIFY:** Receiving acceptance, authorized role, secure receipt.	No release into next stage.	Saltcombe + receiving	S4 / S14	No acceptance -> hold/return/reschedule.
A6	**VERIFY:** Rates, taxes, funding source, partner commitment.	Estimate may differ from commitment.	Petra + finance	S7	Estimate uncommitted; no spend without approval.

Complete change record and final disposition

Baseline note: the reviewed draft was not supplied. Entries below use only the review findings in the brief and explicit control gaps closed by v1.1.

ID	REVIEWED DRAFT BASELINE / FINDING	REVISION IN v1.1	IMPACT | OWNER / STATUS
CR-01	**Document status:** no approval-ready revision record was available in the reviewed draft.	Versioned v1.1, marked draft for Petra, and stated it supersedes the reviewed draft.	Single approval dependency; no approval implied. **Owner:** Iris | **Status:** recorded
CR-02	**Escort:** Anders Dimitrov found changed coverage; the single-assignment assumption is not reliable.	Escort A/B model, G3 overlap, named backup, and uncovered leg = no-go.	Changes S5/S9-S14 and adds $2,400 estimate; Saltcombe verifies; Petra approves alternate spend. **Owner:** Iris + Saltcombe | **Status:** S5/S8 verify
CR-03	**Jurisdiction:** one standard workflow made Ontario and Quebec controls undifferentiated.	Separate Ontario release, G3 dual control, Quebec acceptance; Granthill verifies.	Adds S6/G3 evidence and hold on conflict; no legal conclusion asserted. **Owner:** Granthill | **Status:** by S6
CR-04	**Safety:** acute deterioration could be catastrophic if treated as routine work.	Distinct trigger/stop/emergency branch with local decision authority and resume criteria.	Page 6 supersedes routine timing; clinical lead/emergency service controls; event record required. **Owner:** clinical lead + Iris | **Status:** embedded
CR-05	**Procedure failure:** no explicit safe completion boundary was visible.	Safe hold, no improvisation, fallback/reschedule, reauthorization, and exception-log fields.	Missing control cannot be silently waived; S15 buffer protected. **Owner:** Iris | **Status:** embedded
CR-06	**Readiness/handoff:** minimum clinical/document/receiving evidence was not visible.	G0 pack, consent/privacy, medication/equipment continuity, secure record, acceptance, and receipt.	Adds S2-S4/S8/S14 dependencies and owners. **Owner:** clinical lead + receiving role | **Status:** before release
CR-07	**Schedule/budget:** no explicit buffer or reconciled CAD model was available.	Friday schedule through closeout, 60-minute buffer, $10,000 subtotal, 15% contingency, $11,500 total.	Petra funding gate at S7; estimates remain unconfirmed; actuals close at G5. **Owner:** Petra + finance | **Status:** estimate/pending

FINAL DECISION / DISPOSITION

CONDITIONAL APPROVAL FOR CONTROLLED EXECUTION. Petra Garrido is the routine release and funding approver. Execution may begin only after G0/G3/G4 evidence, current clinical readiness, Escort A/B or an approved alternate, the Friday slot, and the secure handoff path are confirmed. Until Petra records approval and those gates are green, the disposition is **HOLD / RESCHEDULE**; any acute trigger or incomplete control invokes page 6 and supersedes routine timing.

Plan owner: Iris Carmody | review basis: Anders Dimitrov | coordination: Granthill Chambers + Saltcombe Partners | prepared 16 Aug 2026
