Hartsmere Works surveillance records

Frozen source bundle issued for the annual respiratory surveillance completion review. Records included below are limited to the stated export boundary.

Bundle control	Value
Source set	Wheatcroft Alliance Service Agreement and associated occupational-health record extracts
Applicable location	Hartsmere Works
Frozen-record boundary	17 May 2026, 18:00 UTC
Handling	Confidential - occupational-health and compliance use

Contract excerpt

Document	Wheatcroft Alliance Service Agreement - Schedule 4: Hartsmere Works
Effective date	01 January 2026
Clause	7.3 Annual respiratory surveillance

Clause 7.3 - reporting definition. For workers assigned to Hartsmere Works, annual respiratory surveillance is recorded as **complete** only when all of the following have been recorded for the same surveillance episode: (a) collection of the required specimen; (b) a laboratory result issued with status **FINAL**; and (c) clinician review documented together with the applicable occupational disposition. The laboratory status **FINAL** describes laboratory processing status only. It does not by itself record completion of the entire surveillance requirement.

Record-set boundary

This bundle is a frozen compilation of the contract excerpt, the clinical encounter extract and the laboratory-results export. It does not represent records created or made available after 17 May 2026, 18:00 UTC.

Occupational Health Encounter Note

Clinical record extract | Acorn OH Clinical Record

Encounter date	14 May 2026
Author	Laila Hendricks, Occupational Health Clinician
Worker	Ibrahim Bruns
Assignment	Hartsmere Works
Encounter reference	OH-HW-260514-117

Narrative entry

Ibrahim Bruns attended the annual respiratory surveillance appointment for the Hartsmere Works assignment. The required specimen was collected during this encounter for the HWS Annual Respiratory Surveillance Test. Worker trace code HWS-IB-4427 was recorded in this narrative for the laboratory handoff. The worker also mentioned seasonal hay fever managed with an over-the-counter antihistamine and prior knee discomfort after recreational activity. No care was requested for those matters at this appointment.

Related clinical documentation in this frozen extract

Record element	Entry present in supplied extract
Specimen collection	Recorded in the narrative entry dated 14 May 2026
Clinician review / interpretation	No entry documented for this surveillance episode
Occupational disposition	No entry documented for this surveillance episode

The worker trace code is recorded only within the narrative entry above. This extract contains no separate clinician review, interpretation or occupational-disposition entry for the episode before the frozen-record boundary.

Laboratory Results Snapshot

Wheatcroft Central Laboratory Results Hub | Hartsmere annual respiratory surveillance

Exported	17 May 2026, 18:00 UTC
Status	Frozen export - results present at the stated boundary only
Client	Wheatcroft Alliance / Hartsmere Works

Results in scope

Patient	Client linkage	Test	Specimen collected	Accession	Result status	Finalised
I. Bruns	...4427	HWS Annual Respiratory Surveillance Test	14-May-2026	WCL-26-0514-8831	FINAL	16-May-2026 10:42 UTC

Snapshot format and limit

The laboratory snapshot reports the patient label, client-linkage suffix, test, specimen collection date, accession, laboratory result status and finalisation date. It does not include fields for clinician review, fit-for-work status, restriction or occupational disposition. FINAL is a laboratory processing status in this export.

> No later clinical or laboratory record is included in this frozen source bundle. The absence of a field in this export does not state whether an event occurred outside the exported record set.
