Eldergrove Provisions

Formal response on the Scottish record-transfer headline

To: Idris Petrosyan, Greyhaven Authority Records Operations

Re: returned public transfer figure

Eldergrove Provisions considers that the public headline of 9 is not supportable. Our proposed figure is **5 completed patient-authorised record transfers in Scotland** as at the close of 18 November 2028.

Records challenged

We ask Greyhaven to review GHT-28-042, which appears twice as completed or acknowledged; GHT-28-043, which shows a withdrawal before completion; GHT-28-044, which we consider withdrawn; GHT-28-048, whose sending service is outside Scotland; and GHT-28-049, where authorisation evidence is not recorded.

Our position

The existing total appears to count an overlapping completed history and entries that should not form part of the Scottish public figure. We do not consider GHT-28-044 eligible because its authorisation was withdrawn before the recorded completion. Please correct the notice before approval.
