Fernhollow Terminals — Elmsworth Cooperative

Cross-border discrepancy review | Prepared by Arjun Fontaine for Vera Haldorsen | 11 May 2026

Recommendation

Refer SVK-2404, SVK-2406 and SVK-2407 for Eldermark compliance action using a minimised, logged package; do not refer Narthaven on the current final population. This supports a referral decision only, not a finding of misconduct, loss, or breach.

Observed final active exposure: **$5,510.00** — Narthaven Republic: 2 cases / $2,410.00; Eldermark Province: 3 cases / $3,100.00.

Reconciled case register

Source-visit key	Visit / txn	Jurisdiction	Final status	Final discrepancy	Source evidence IDs	Jurisdiction assessment
SVK-2401	FT-88431	Narthaven Republic	Under review	$1,600.00	EVD-TX-01, EVD-MSG-01, EVD-TX-09	Aggregate $2,410 / 2 active cases (threshold $2,500 or 3 cases); No current referral trigger; retain and monitor
SVK-2402	FT-88444	Narthaven Republic	Closed - resolved	$0.00	EVD-TX-02, EVD-TX-10, EVD-MSG-02	Inactive final state; excluded from active-population trigger test; No current referral action — inactive final state
SVK-2403	FT-88452	Narthaven Republic	Escalated	$810.00	EVD-TX-03, EVD-INT-01	Aggregate $2,410 / 2 active cases (threshold $2,500 or 3 cases); No current referral trigger; retain and monitor
SVK-2404	FT-88469	Eldermark Province	Under review	$1,210.00	EVD-TX-04, EVD-TX-05, EVD-MSG-03, EVD-TX-11	Case $1,210 and aggregate $3,100 (threshold $1,200 individual or $2,000 aggregate); Refer for Eldermark compliance action
SVK-2405	FT-88473	Eldermark Province	Withdrawn	$0.00	EVD-TX-06, EVD-TX-12, EVD-MSG-04	Inactive final state; excluded from active-population trigger test; No current referral action — inactive final state
SVK-2406	FT-88488	Eldermark Province	Under review	$1,410.00	EVD-TX-07, EVD-INT-02, EVD-TX-13	Case $1,410 and aggregate $3,100 (threshold $1,200 individual or $2,000 aggregate); Refer for Eldermark compliance action
SVK-2407	FT-88501	Eldermark Province	Open	$480.00	EVD-TX-08, EVD-STK-01	Case $480 and aggregate $3,100 (threshold $1,200 individual or $2,000 aggregate); Refer for Eldermark compliance action

Method note

Selected reading: Reading A treats each distinct source visit as one transaction-level case. The source-visit key is the audit anchor. SVK-2404 appears twice in the opening export with the same visit/transaction reference and amount; its first representation is the starting record, while EVD-TX-05 remains linked evidence, not a second amount-bearing case. The opening state is replayed with events in supplied sequence: amount adjustments change amount and status updates replace status. Active means final Open, Under review or Escalated; Closed - resolved and Withdrawn are inactive.

Admissible evidence is the opening/event record plus stable Evidence IDs in the Evidence register. The Retired ref column and the Workpad residual formula-error cell are spreadsheet scaffolding, excluded from joins, amounts, status, evidence citations, projections and conclusions. Material types reviewed include transaction records, messages, interview notes and stakeholder feedback.

Jurisdiction comparison

Jurisdiction	Trigger / observed state	Evidence requirement	Timing / retention	Result
Narthaven Republic	Aggregate ≥ $2,500 OR 3+ active cases; observed 2 / $2,410.00.	Transaction record + linked message, interview note, or stakeholder feedback.	5 business days; 6 years.	No current trigger; retain and monitor.
Eldermark Province	Any case ≥ $1,200 OR aggregate ≥ $2,000; observed 3 / $3,100.00.	Transaction may open screening; action referral needs transaction + linked message, interview note, or stakeholder feedback.	10 calendar days; 7 years.	SVK-2404, SVK-2406, SVK-2407 meet trigger and corroboration standard.

Jurisdiction	Trigger / observed state	Evidence requirement	Timing / retention	Result
Cross-border handling	Applies to either route.	Minimise transfer; use evidence IDs first; log recipient and purpose; full interview text only if necessary and logged.	At first transfer.	Apply to Eldermark package.

Projections

Observed final active exposure is $5,510.00. **Primary — Continued recurrence:** $5,510.00 × 60% recurrence × 3 months = **$9,918.00 projected incremental exposure**; no containment, recovery, or new source-visit population beyond recurrence. **Alternative — Containment and recovery:** $5,510.00 × 25% recurrence × 1 month × (1 – 40% recovery) = **$826.50 projected net incremental exposure**; no new source-visit population beyond recurrence. These are scenario outputs, not confirmed future loss. The recurrence/containment assumption materially changes projected referral exposure.

Evidence assessment

Each retained active case is linked to material evidence: SVK-2401 (EVD-TX-01, EVD-MSG-01, EVD-TX-09); SVK-2403 (EVD-TX-03, EVD-INT-01); SVK-2404 (EVD-TX-04, EVD-TX-05, EVD-MSG-03, EVD-TX-11); SVK-2406 (EVD-TX-07, EVD-INT-02, EVD-TX-13); SVK-2407 (EVD-TX-08, EVD-STK-01). Inactive-key material remains in the source trail.

Next bounded action: issue the Eldermark minimised referral package within 10 calendar days, log receiving team and purpose, retain material for 7 years, and monitor Narthaven pending any later active-case or exposure change.
