PEER-REVIEW TRANSMITTAL

To: Delphine Gallagher, Program Subject-Matter Specialist
From: Compliance Officer, Emergency Management Office
Date: August 20, 2026
Package: Lars Lombardi — hazard-mitigation subaward, culvert activity

Decision embodied. The package imposes five policy-based specific conditions on Lars Lombardi while the culvert activity is approximately half complete and approximately $140,000 has already been drawn: accounting/supporting records, remaining-work schedule/status, material-change notice, future draw/reimbursement support, and completion/closeout evidence. The response point is ten business days after receipt (September 3, 2026 if received August 20, 2026). The notice uses “specific condition” in the policy’s temporary-control sense and “enhanced monitoring” for the added evidence and review.

Judgement and wording points for peer review. Please confirm that (1) the must/should boundary is clear: the five controls are mandatory, while a check-in or site/status update is expressly discretionary; (2) the Accounting and Supporting-Records Package is specific enough to account for funds already drawn without implying a fraud finding; and (3) the response date and evidence timing for future requests and closeout are operationally monitorable.

Status and escalation treatment. The register uses the policy status values. Missing or late evidence begins as Pending Evidence or Incomplete Evidence, not a violation; a Substantiated Issue requires review of the available record. The bounded sequence is clarification/missing-evidence request, documentation, and referral of proposed adverse award action through the authorized process.

What this package does not decide. It is not a termination, suspension, debt acceleration, or promise of reimbursement, continued funding, waiver, or payment timing. It does not decide whether a bankruptcy stay applies or its effect, creditor remedies, or other bankruptcy-law rights; those questions remain with county counsel Magdalena Ruiz-Hale. It makes no fraud or misconduct finding and contains no invented grant, contract, address, or payment identifiers.

Requested peer review. Please mark any needed calibration to condition labels, evidence descriptions, or the escalation sentence before signature. The external letter should remain the operative communication to Lars; this transmittal creates no additional requirement.
