# Retinal Outreach Allocation Recommendation

Tanneryside Clinic • For Aneta Ainsworth and the Wintergate Board

**Decision requested.** Approve the mixed-channel set below for Sasha Vasquez to place before the 30 June budget expiry. Ready for review by 20 June 2026.

| Measure | Recommended plan | All-overtime alternative |
|---|---|---|
| Selected blocks | OT-06, VC-01, VC-03, VC-04, VC-05, SMS-01, SMS-02, SMS-03, SMS-04 | OT-01, OT-02, OT-03, OT-04, OT-05, OT-06, OT-08 |
| Spend | $11,400 | $8,050 |
| Expected confirmed bookings | 1146 | 605 |
| Cost per confirmed booking | $9.95 | $13.31 |

**Recommendation.** Fund OT-06, VC-01, VC-03, VC-04, VC-05, SMS-01, SMS-02, SMS-03, SMS-04. The set maximizes expected confirmed screening appointments (1146) while spending $11,400 of $11,500 ($100 remaining). Cost per confirmed booking is $9.95. The all-overtime benchmark yields 605 bookings, so the recommendation adds 541 bookings (89.4%).

**Operational feasibility.** Every source segment is covered using explicit source flags; general-language blocks are not credited for Spanish or Hmong. Spanish coverage comes from selected blocks marked Spanish-speaking, and Hmong coverage from blocks marked Hmong-speaking, with language closing demand never exceeding the two available clerks. Selected activity avoids the 23–25 June blackout and stays within each permitted date. Per-date booking-clerk demand is at or below the two-clerk ceiling.

**Assumptions and trade-off.** Confirmed bookings are source-provided expected yields, not contacts or guaranteed outcomes; binary segment coverage does not mean all 2,380 overdue patients will be reached or booked. The mixed set requires coordination across vendor, SMS, mail, and overtime channels, but improves expected bookings before funds expire.

**Approval owner:** Aneta Ainsworth • **Prepared by:** Sasha Vasquez, Patient Access Supervisor • **Organization:** Tanneryside Clinic
