Parking Charge Compliance

Bounded lease-control determination

April 2026 assessment | Colorado and Washington

Prepared by Hawthorne Industries for Orrindale Collective. The review applies only the supplied portfolio lease controls and the supplied source records.

ASSESSED CHARGE

$9,189.18

Monthly current assessment

COMPLIANT COMPONENT

$8,973.62

Within the supplied control rates

NONCOMPLIANT EXCESS

$215.56

Portion above supplied control rates

5 of 8 current lines contain a noncompliant excess.

The assessed charge is not treated as entirely noncompliant: the compliant component and the above-control excess are shown separately throughout this presentation.

Result under the supplied lease controls

Five of eight disputed April assessment records have a positive noncompliant excess. The portfolio assessed charge is $9,189.18; the allowed component is $8,973.62; and the above-control excess is $215.56.

CONTROL LABELS

5 noncompliant lines

3 compliant lines

Current measure	Amount	Basis	Rate test	Control meaning
Assessed charge	$9,189.18	306 spaces	Billed per-space rate	All current charges
Compliant component	$8,973.62	3 lines without excess	Lower of billed/control	Within control rate
Noncompliant excess	$215.56	5 lines with excess	Positive billed-control difference	Above control rate

Each parking package is converted to 17 individual spaces before the per-space rates are applied.

Separate source-defined planning cases

Case	Months	Packages	Cumulative assessed	Cumulative compliant	Cumulative excess	Avg. monthly	Avg. less Apr
Continuity	8	144	$72,704.24	$72,205.80	$498.44	$9,088.03	$-101.15
Consolidation	8	90	$45,472.96	$45,132.79	$340.17	$5,684.12	$-3,505.06

Continuity $72,704.24 cumulative assessed charge; $72,205.80 cumulative compliant component; $498.44 cumulative noncompliant excess.

Consolidation $45,472.96 cumulative assessed charge; $45,132.79 cumulative compliant component; $340.17 cumulative noncompliant excess.

Consolidation's 90 cumulative packages are lower than Continuity's 144, producing lower case amounts. The average-month change compares each case's displayed average monthly assessed charge with April 2026. Cases remain conditional planning inputs and are not combined.

Source qualifications resolved in the assessment

Key normalization	The case-only qz-481a variant and the trailing-space LM-763Q variant are normalized only for matching. Received keys remain traceable to matched property and lease records.
Package conversion	Every current and forecast package quantity is converted to 17 individual spaces before rates and amounts are calculated.
Currency precision	The 28.7300000004 stated rate is treated as $28.73 at ordinary currency precision, so it does not create a false excess at the $28.73 control rate.
Property rate notes	Documented billed and control-rate amendments apply only to the named property, rate type, and source-effective period; their effects are not assumed to move in one direction.
Legacy residual	The prior analyst residual field contains a deleted-reference formula error. It is non-authoritative and excluded from all results.

Traceable determination, bounded to supplied controls

Source area	Coverage	Traceability carried into workbook
Disputed assessment	8 April 2026 source records	Assessment ID and received property key retained
Property and lease	8 matched register records	Matched property key, lease ID, jurisdiction, leasing entity
Rate authority	Billed and control rate histories	Source-effective base rate and applied property note shown per line

Current conclusion

Under the supplied controls, 5 of 8 April 2026 lines contain $215.56 of noncompliant excess. The remaining $8,973.62 is the compliant component of the $9,189.18 assessed charge.

This presentation documents the bounded lease-control determination. It does not make an external-law conclusion or address post-determination disposition of any amount.
