SALT MARSH PROVISIONS

Release candidate decision basis

Corrected version: Saltmarsh_corrected_briefing.docx - Release Candidate RC-1 | Runtime: 02:17 | Release deadline: Friday, 26 Sep 2025, 3:00 p.m. Pacific

Factual editorial readiness

RC-1 reconciles the supplied incident records and the frozen Oregon-British Columbia snapshot dated 18 September 2025. It is supportable as a release candidate for Sasha Haldorsen's decision. This brief records editorial readiness only; it does not authorize distribution.

Declared headline scope	Headline	Separate confirmed event
Customer-impact events: confirmed events with consumer sales units distributed to customers.	5 confirmed events 2,426 consumer sales units distributed to customers	OR-4190: 240 consumer sales units held before dispatch; outside headline.

Material corrections and assumptions

- Normalized case IDs by trimming whitespace and matching case-insensitively, restoring the British Columbia case omitted by the literal lookup.
- Applied the explicit Notes corrections to quantity, quantity basis, jurisdiction, and disposition before conversion and aggregation.
- Converted packs and shipments to consumer sales units; removed public copy that treated packs or shipments as consumer quantities.
- Moved the scope boundary before the headline, reported the held-before-dispatch event separately, and used the frozen 18 September 2025 comparison wording.
- Removed unsupported recall, cause, and live-web assertions.

Remaining production items

Owner	Remaining item	Due
Renata Nakamura	Sign off the RC-1 facts and calculations.	11:00 a.m. PT
Priya Desai	Check final Oregon and British Columbia wording against the frozen snapshot.	11:30 a.m. PT
Miro Alvarez	Lay the RC-1 sequence and 02:17 timing to picture.	12:15 p.m. PT
Tessa Yoon	Place final supers and captions from RC-1.	1:00 p.m. PT
Sasha Haldorsen	Review the complete RC-1 package and record the release decision.	2:30 p.m. PT
