Kelverdon mineralogy gallery

Audio-description marked script | revision basis: transition layout → final layout

Writer	Agnes Dimitrov	**Access approval**	Bekele Cordova
Delivery / fit-out	Ironvale Logistics / Westmere Manufacturing	**Production point**	Voice session Friday; gallery opens in five weeks

How to use this mark-up. Source lines are stable IDs. Each flagged line has a replacement (or an explicit keep/verify instruction), a principle-based reason, and a status. “Transition” is not a recording approval; only the final-layout version can be access-ready.

Source sequence and line decisions

REF	SOURCE LINE	EDITORIAL REPLACEMENT	REASON / STATUS
L01	**Source** NARRATOR: The mineralogy gallery opens with a wall of specimens.	**Marked wording** KEEP. Narrator: “The mineralogy gallery opens with a wall of specimens.”	**Principle** Orientation first: concrete and listener-facing; no unsupported detail. STATUS: KEEP.
L02	**Source** NARRATOR: The dark, jagged crystal seems to hold the memory of ancient fire.	**Marked wording** REPLACE. Narrator: “A dark, jagged crystal rises from its mount.” Interpretation may follow only if explicitly labelled as interpretation.	**Principle** Description must state what can be observed. “Holds the memory” is an inference, not a physical attribute. STATUS: REVISE.
L03 | 14 s gap	**Source** NARRATOR (about 200 words assigned to a 14-second gap): “Minerals are often described as silent records…” [full curator passage continues through formation, trade, and human wonder.]	**Marked wording** REPLACE for the gap: “A mineral specimen catches the light. Its angular faces meet in sharp edges.” (Approx. 14 seconds only after a spoken rehearsal; move the remaining supported context to a later gap or retain it in the written guide.)	**Principle** The original passage is approximately 200 words and cannot be treated as recordable in 14 seconds. Word count is an estimate, not a performance guarantee. STATUS: REVISE / TIME-CHECK.
L04	**Source** NARRATOR: The label beside it names the mineral and its recorded provenance.	**Marked wording** KEEP, subject to final label check. Narrator: “The label beside the specimen names the mineral and records its provenance.”	**Principle** Spoken description and gallery text are distinct; verify the label in the final installation before recording. STATUS: VERIFY.
L05	**Source** “It was collected when the collection first travelled here.”	**Marked wording** REPLACE. “A second voice says, ‘It was collected when the collection first travelled here.’”	**Principle** The source changes voice without a cue. Signal the transition without inventing identity, emotion, or biography. STATUS: REVISE.
L06	**Source** NARRATOR: The sentence ends as the track moves to the next case.	**Marked wording** KEEP. Narrator: “The sentence ends as the track moves to the next case.”	**Principle** A short, neutral bridge supports pacing and orientation. STATUS: KEEP.
L07	**Source** [bright chime]	**Marked wording** REPLACE cue: “[Sound cue: bright chime.]” Retain only if the chime is present in the approved mix; do not name its source or meaning.	**Principle** The source gives an audible event without a listener or production cue. Identify what is heard without claiming why it occurs. STATUS: IDENTIFY / VERIFY.
L08	**Source** NARRATOR: The specimen sits in the left-hand case.	**Marked wording** REPLACE. Narrator: “The specimen is displayed in the current case.”	**Principle** The specimen moved in the final layout; the former location is stale. Avoid directing a listener to an obsolete position. STATUS: REVISE / FINAL-LAYOUT VERIFY.

REF	SOURCE LINE	EDITORIAL REPLACEMENT	REASON / STATUS
L09	**Source** NARRATOR: From the left-hand case, the specimen is nearest the doorway.	**Marked wording** REPLACE. Narrator: “The specimen is displayed with the other mineral specimens.”	**Principle** Second stale reference to the moved specimen. Use a layout-safe relation until the final position is confirmed; do not assert a new location. STATUS: REVISE / FINAL-LAYOUT VERIFY.
L10	**Source** NARRATOR: A narrow caption closes the sequence.	**Marked wording** KEEP, after final-layout check. Narrator: “A narrow caption closes the sequence.”	**Principle** Concrete, concise visual information; no pointer such as “here” that would depend on sight. STATUS: VERIFY.

Operating notes for the changeover

NOTE	OPERATING INSTRUCTION
STATUS CONTROL	This file is “TRANSITION MARK-UP — NOT FOR FINAL RECORDING.” Agnes revises source lines and preserves the L01–L10 IDs. Bekele approves content only after the final layout is in service; a separate listen-through establishes performance readiness. The transition and final layouts are not treated as simultaneously final.
CURRENT CHANGEOVER	Do not record or approve L08–L09 as location statements. Their transition-safe replacements may be used for a temporary read only if the team needs continuity, but they remain held from the Friday final take until the final display is checked. If a line becomes inaccurate after the move, replace it in the final-layout version and retire the transition wording; do not carry both versions forward.
FINAL-LAYOUT BASIS	When the final layout is in service, verify the specimen references, the label at L04, and the caption at L10 against what is installed. Bekele’s access-ready decision is based on that verified version. Agnes owns wording and factual traceability; Bekele owns access approval. Ironvale Logistics and Westmere Manufacturing are delivery/fit-out context, not additional editorial approvers.
14-SECOND CHECK	Treat the L03 gap as a hard usable gap: the concise replacement is an estimate, not a guaranteed duration. Rehearse it at the intended delivery pace with the adjacent track. If it overruns, log the failed take and move nonessential supported context to another available gap; never silently drop or invent a factual claim.
CONFLICT RULE	If a curator-approved factual phrase cannot fit the accessible gap, preserve the fact but compress only supported wording and relocate nonessential detail. Curator approval does not override a usable timing constraint, and timing does not permit deleting, altering, or fabricating a factual claim. Hold the phrase for a later gap if it cannot be kept accurately and intelligibly.
RECORDING-READINESS CHECK	Before Bekele approves: (1) rehearse/listen at delivery pace and confirm L03 fits the 14-second gap; (2) hear the speaker transition at L05; (3) confirm the L07 chime is present and labelled as a sound cue; (4) verify L08–L09 against the final layout; (5) record any timing failure and its factual-preserving resolution. This check supports professional access work; it is not a legal opinion, a universal accessibility guarantee, or a jurisdiction-wide compliance finding.

Editorial disposition

HOLD FOR FINAL-LAYOUT VERIFICATION; THEN RELEASE THE MARKED REPLACEMENTS AS THE ACCESS-READY SCRIPT FOR FRIDAY’S VOICE SESSION. The transition mark-up is complete and actionable, but it is not the approved recording copy until the final display references and the 14-second rehearsal check pass.
