BOARD PACK | DECISION SUPPORT

Disputed move-out case response

Dalefield Foundry | Yarrowfield Energy corporate letting | former occupier: **Cecilia Montague**

Purpose: give the Dalefield Foundry Board a factual basis to decide how or when to issue a revised customer response. This paper does not advocate an outcome.

ORIGINAL CUSTOMER STATEMENT	REVIEWED LEDGER POSITION	DEPOSIT HELD
£1,860	**£1,240**	**£1,500**
4 October | statement record	11 October | posted ledger	deposit record | no disposition proposed

Case at a glance

Record / status	What it establishes	Provenance
Posted: £1,240	Current accounting position as of 11 October; not a finding that every component is supported.	Ledger
Substantiated: £980	Amount presently supported for customer-facing assertion.	Callum Falconer's incident log
Disputed / held: £260	Unresolved ledger-to-evidence difference. It remains visible and is not waived.	Difference between ledger and incident log

SEPARATE PRIORITY: SAFETY ALLEGATION

Cecilia Montague alleges that a required fire-door inspection did not occur. This is an **unverified allegation**, not a finding. Its potential severity requires prompt, separate referral; it is outside the charge arithmetic.

Prepared for Wilhelmina Adeyemi. Review comments from Genevieve Jankowski request one neutral account of what changed and what the Board must decide.

Chronology and material change

When	Record-derived event	Effect on the case
4 October	Original customer statement: **£1,860**	Earlier stated position; £360 above the £1,500 deposit.
Between 4 and 11 October	Ledger credits: **-£620**	Temporal ledger movement. It is not the incident-log discrepancy.
11 October	Reviewed ledger position: **£1,240**	Current posted balance; £260 below the deposit.
noon Friday	Board pack closes	Decision is required by the Dalefield Foundry Board; execution follows only after its decision is recorded.

What changed between the two positions

4 October
£1,860
Original statement

LESS
-£620
Ledger credits between periods

11 October
£1,240
Reviewed posted ledger

CHECK
=£1,240
£1,860 - £620

Material-change explanation

The posted amount reduced by **£620** because the ledger records credits between the 4 October statement and the 11 October review. The current ledger is therefore £1,240. Separately, only £980 is presently supported by the incident log, leaving a £260 evidentiary gap.

The full customer callback and an independent second review cannot both be completed before noon Friday. This leaves some support unresolved at the Board-pack cutoff.

Reconciliation basis: split register

Basis used: the ledger governs the amount shown as the **posted financial position**; Callum Falconer's incident log governs the amount described as **presently substantiated / assertable to the customer**. The records answer different questions and are both retained. The difference is neither silently accepted nor removed.

Register	Amount	Status and permitted treatment	Source / review date
Posted accounting register	**£1,240**	Posted ledger position. Correct the record only if an inaccuracy is established; do not equate a correction with a waiver.	Ledger | 11 October
Customer-facing evidence register	**£980**	Substantiated by the incident log and presently supportable in a factual response.	Callum Falconer's incident log | source date not supplied
Unresolved item	**£260**	Disputed / unsupported pending evidence; place or preserve a hold. Do not waive, write off, or delete it.	£1,240 - £980

Known record dates: original statement, 4 October; reviewed ledger, 11 October. No separate source date was supplied for the incident log or deposit record; their provenance and status remain identified rather than inferred.

Evidence reconciliation

POSTED LEDGER	CURRENTLY SUBSTANTIATED	DISPUTED / HELD GAP
£1,240	**-£980**	**£260**
11 October | ledger	Callum Falconer incident log	pending support; not a waiver

Check: £1,240 posted ledger - £980 currently substantiated = £260 disputed / held evidentiary gap.

What would resolve the gap

Obtain a contemporaneous supporting record or an accountable confirmation that links the currently unsupported £260 to the incident-log evidence. Until then, preserve the ledger entry, incident log, statement, and review comments as separate records.

Finance reading guide: **posted** is recorded in the ledger; **credited** is the between-period reduction; **substantiated** is supported for assertion; **disputed / held** remains open; **deposit held** is a separate security record.

Deposit context and authority boundary

The deposit comparison is context only. It is not a charge decision, an offset, a validation of any charge, or a deposit disposition.

EARLIER PERIOD COMPARISON

£1,860

4 October original statement

was £360 above the £1,500 deposit

CURRENT PERIOD COMPARISON

£1,240

11 October posted ledger

is £260 below the £1,500 deposit

Two different £260 relationships

Evidence gap: £1,240 posted ledger - £980 incident-log-substantiated = £260. This is disputed / held pending support.

Deposit surplus: £1,500 deposit held - £1,240 current posted ledger = £260. This is a separate deposit comparison.

The matching number does not make the concepts interchangeable.

Permitted record action vs. charge waiver

Action	Permitted treatment	Boundary
Correct record	Correct an inaccurate amount or status when the record supports that correction; retain original and superseded positions with reason and effective date.	Accuracy work is not commercial forgiveness.
Hold disputed item	Place or preserve a hold on the £260 unsupported portion, keeping it visible pending evidence.	A hold is not deletion or waiver.
Waive / write off / forgive	Outside concierge and frontline authority; requires separate authority.	No waiver is proposed in this paper.

Audit trail: retain the 4 October £1,860 statement, £620 credits, 11 October £1,240 ledger position, Callum Falconer's incident-log position, Genevieve Jankowski's review comments, and all later versions.

Safety matter: immediate, separate referral

UNVERIFIED ALLEGATION REPORTED BY CECILIA MONTAGUE

Cecilia alleges that a required fire-door inspection did not occur.

This is a received report, not an established event or a technical conclusion. The potential severity warrants priority handling outside the ordinary charge-dispute queue.

Required handling that does not depend on the Board response option

Owner	Immediate action	Record and communication control
Idris Tikhonov: record and referral only	Promptly hand off to the **Building Safety / Facilities Duty Manager**, who is accountable for competent assessment.	Preserve Cecilia's original allegation, received date/time, and related records. Log referral time, receiving role, and case link.
Building Safety / Facilities Duty Manager	Assess through the competent safety or facilities function. The concierge does not decide whether an inspection occurred.	Keep technical assessment separate from charge arithmetic and Board charge-response selection.
Customer-facing acknowledgment	Confirm receipt and referral only; do not state that inspection failure, liability, breach, or resolution has been established.	Suggested wording: 'We have received your allegation about a fire-door inspection and referred it for assessment. We cannot confirm an outcome at this stage.'

Independence from charge response

The safety referral proceeds promptly whether the Board selects an immediate revised factual response or defers the substantive charge response. It does not alter, offset, validate, or invalidate £1,860, £620, £1,240, £980, £260, or the £1,500 deposit.

Use need-to-know circulation: customer and allegation detail goes only to roles required for case handling and safety assessment.

Board decision required

Decision question for the Dalefield Foundry Board: By noon Friday, should the revised customer response be issued now with the £260 evidence gap transparently disputed / held, or should the substantive charge response be deferred while a holding communication is issued?

Both paths preserve the split-register basis, the same amounts and statuses, the authority boundary, and the immediate separate safety referral.

OPTION A | ISSUE A REVISED FACTUAL RESPONSE NOW

State £1,240 as the 11 October posted ledger position; state £980 as currently substantiated by Callum Falconer's incident log; identify £260 as disputed / held pending support.

Customer / financial: gives a current factual position and preserves the £1,500 deposit context without making a disposition.

Evidence / audit: avoids asserting the disputed £260 as substantiated; requires a visible hold and source trail.

Service / deadline: substantive response can be issued by the Friday cutoff; further evidence and any full callback remain open.

Safety: immediate separate referral to Building Safety / Facilities Duty Manager, unchanged.

OPTION B | DEFER SUBSTANTIVE CHARGE RESPONSE; SEND HOLDING COMMUNICATION

Preserve £1,240 as posted, £980 as currently substantiated, and £260 as disputed / held while evidence is sought; do not send a substantive charge conclusion yet.

Customer / financial: acknowledges the case and gives a next update without presenting the disputed portion as proven; deposit remains £1,500 held.

Evidence / audit: gives additional time to seek support or accountable confirmation; all source records and the hold remain visible.

Service / deadline: holding communication can be issued by the Friday cutoff; substantive response follows the recorded evidence outcome.

Safety: immediate separate referral to Building Safety / Facilities Duty Manager, unchanged.

Record the Board decision

Selected option: _____ Board decision owner / authority: Dalefield Foundry Board

Decision time: _____ Conditions / evidence follow-up:

_____

Recorder and case-record version:

_____

The Board decision required is selection of Option A or Option B, with any condition recorded. Idris Tikhonov executes only the documented selection; no charge waiver is authorized by this paper.
