Application service

Draft saved.

IMPLEMENTATION & STATE HANDOFF

URGENCY: The banner says Scheduled maintenance; it does not imply an emergency.

TIME WINDOW: The supplied example window is 22:00–23:00 UTC on 20 November 2026.

SCOPE: The text says application submissions are unavailable during that window.

USER ACTION: Save a local copy before the maintenance window is the actionable instruction.

PERSISTENT NOTICE: The main notice is not auto-dismissed by a timer.

NON-COLOR CUE: A visible information icon and text label identify notice type.

LINK PURPOSE: A link reads Read maintenance details, not Click here.

INLINE DISTINCTION: A separate inline success specimen says Draft saved.

LIVE-REGION POLICY: Only a newly inserted status is announced politely; static content is not repeatedly announced.

PRIORITY ORDER: The site notice sits above the main service heading.

NARROW STATE: The 320 px banner reflows its time window and action without clipping.

NO FALSE GUARANTEE: The design does not promise automatic submission after maintenance.
